

Café Scientifique - Healthy Cities

The Institute of Population and Public Health (IPPH), along with the City Institute (CITY), invite you to join us for a discussion (and refreshments) on Healthy Cities, with:

Panelists:

Dr. David Buckeridge, Associate Professor, McGill University

Dr. Buckeridge is an Associate Professor of Epidemiology and Biostatistics at McGill University in Montreal. He is also a Medical Consultant to the Montreal Public Health Department, the Quebec Public Health Institute, and the Quebec Institute for Excellence in Health and Social Services. Dr. Buckeridge has consulted on surveillance to organizations such as the Public Health Agency of Canada, the US Institute of Medicine, the US and Chinese Centers for Disease Control, the European Centers for Disease Control, and the World Health Organization.

Dr. Lise Gauvin, Professor, Université de Montréal

Dr. Lise Gauvin is a Full Professor in the Department of Social and Preventive Medicine at the Université de Montréal, a Researcher at the Research Center of the Centre Hospitalier de l'Université de Montréal (CRCHUM), and an Associate Researcher at the Léa-Roback Center on Social Inequalities of Health. Dr. Gauvin's work addresses diabetes from a population health perspective. She and her team focus on how environmental exposures such as urban form, availability of services and amenities, and media messages influence known risk factors for diabetes like low levels of physical activity and hypercaloric eating patterns. Selected projects also revolve around understanding the impact of environmental and policy interventions to promote physical activity or to prevent disordered eating.

Dr. Cory Neudorf, Chief Medical Health Officer, Saskatoon

Dr. Cory Neudorf has been working as a Medical Health Officer in Saskatoon since 1994. He has held various leadership roles in public health at the national level including: President of the Public Health Physicians of Canada, Chair of the Canadian Public Health Association, and Chair of the Canadian Population Health Initiative Council. He is the current President of the Urban Public Health Network. Dr. Neudorf is also an Associate Professor in the Department of Community Health and Epidemiology at the University of Saskatchewan, College of Medicine. His research interests include health inequalities, health status indicators and surveys, health status monitoring and reporting, and integrating population health data and geographic information systems into public health and health planning.

Dr. Patricia O'Campo, PhD

Professor, Dalla Lana School of Public Health, University of Toronto

As a social epidemiologist, Dr. O'Campo has conducted a number of longitudinal and cross-sectional studies in the areas of the social determinants of adult mental health, intimate partner violence, children's well-being (such as youth violence or school readiness and perinatal health) as well as clinic and community based evaluations of programs concerning smoking cessation, prevention of perinatal transmission of HIV, prevention of infant mortality and homelessness.

Chair:

Dr. Harris Ali, Professor and Graduate Program Director, York University

Dr. Harris Ali is a Professor and GPD in the Department of Sociology. Dr. Ali has published on toxic contamination events and disease outbreaks. His current research focuses on the relationship between globalization, urbanization and infectious disease spread. His most recent research involves the spread of tuberculosis amongst the homeless in Toronto, environmental justice and political economy, as well as the potential of complexity theory to investigate environmental health phenomena.

Wednesday, September 20, 2017 - 4-6pm

Schulich Private Dining Room

Everyone is welcome.

Please RSVP to city@yorku.ca
